

WATER ZONE

Electro magnetic water conditioner

Install & Forget

No Water Wastage

No Salts, No Resins

No ongoing maintenance

Features & Benefits

Features

- Electromagnetic Technology
- Innovative Multiflow Design
- Unique Earthing Concept
- Stainless Steel Piping(304)
- Warranty of 24 months
- No chemicals or salts used
- No filters or membranes
- Imported Rare Earth Magnets used 360° rotation
- Micro Controller Processor-Based

Benefits

- No water wastage
- No regular maintenance
- Removes existing scaling
- Reduces hair fall & softer skin
- Less detergent to wash clothes
- Prevents clogging of drip, sprinkler and piping system
- Less power consumption
- Fit and forget & easy to install
- Easy to install

No Chemicals

Environment Friendly

Fast,
Easy
Setup

Installation:

This equipment purely works on flow rate LPH (liter per hour) - liter of water flow per hour. Standard equipment comes with 2 Candles which can process up to 1200 LPH which is sufficient for a small house of around 4-5 people. Anythign more than that will result in reduction in efficiency and optimal performance. For higher flow rate, more number of candles will be required. All the units are custom-made, so our technical team needs to visit the site to do the assessment to understand what kind of equipment will be required as well as what kind of consumables in terms of plumbing will be required.

*5 years warranty product
